

Electric Parallel Bars and Ballet Rail

At Healthtec we pride ourselves on designing and manufacturing quality products that make our clients working lives easier. Our Electric Parallel Bars are a perfect example of this. In what we believe to be a first in the world, here's a new way of doing what has been around for ages.

The electric function enables the practitioner to adjust the bars to fit the patients required height and (optional) width. If for example the patient is in a wheel chair, the bars can be used to lift the patient into a standing position removing any OH&S issues and potential of injuries.

As the unit bolts straight to the floor there are no obstacles for the client to negotiate as they walk, allowing them to totally focus on their practitioners instructions. We can also quote on custom lengths if required.

Electrically operated Parallel Bars

Easy to operate, powered by rechargeable battery.

Lifting Capacity: 185kg

Key Features:

- ◀ Battery backup
- ◀ Infinite Adjustment through total range of movement
- ◀ Simple design
- ◀ Easy to Operate
- ◀ 5 Year Warranty
- ◀ Bolts straight to the floor

Compare the **Quality**, we think you'll be impressed.

Arms operate independently and are capable of lifting patients.
